

Make your own FELT MISTLETOE

1. Cut 4-5 leaf shapes out of green colored felt. Using multiple colors of green is ideal for a more natural, varied look.
2. Stack your leaf shapes together making sure to turn some of them over as you stack. This varies the look of the leaves.
3. Make a loop of yarn, twine, or string long enough for the mistletoe to hang from.
4. Lay this looped string between the stems of some of the leaf layers you've stacked.
5. Wrap the top stems and loop several times to hold all the layers together. Tie knot to secure ends.
6. Lastly, glue white or red pom poms of varying sizes to the leaves for a berry effect.
7. Hang and enjoy!
